Education

University At Buffalo, The State University Of New York

02/2022 - 02/2024

Master of Science in Computer Science, GPA 3.67/4.0

Buffalo, NY

Relevant Courses: Data Structures and Algorithm, Database System, Software Engineering, Distributed Systems,

Operating System, Software Security, Computer Architecture, Machine Learning, Deep Learning, Reinforcement Learning

University At Buffalo, The State University Of New York

08/2018 - 12/2021

Bachelor of Science in Computer Science, GPA 3.33/4.0

Buffalo, NY

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, HTML, CSS, SQL, Python, Golang, C++, Solidity

Web Development Framework: Spring, Nodejs, Express, React, Angular, MongoDB, Bootstrap, Django

Developer Tools: AWS, Google Cloud Platform, Docker, Git, Postman API, CLI, Linux, VSCode, Vim

Professional Experience

Software Engineer - Pixel Art Converter App

08/2024 - current

Self-employed, Web Application (Spring boot, NodeJS, React native)

Remote

- App Store: <https://apps.apple.com/us/app/pixel-art-converter/id6742040975>
- Developed a microservices-based pixelation system using **NodeJS** for image processing and **Spring Boot** for authentication, enabling seamless and scalable image transformations.
- Designed and implemented **JWT-based** authentication and App Store subscription validation, ensuring secure access to premium features and reducing unauthorized usage.
- Optimized image processing performance by implementing nearest-neighbor scaling and in-memory file handling, reducing processing time and enhancing user experience in the **React Native** application.
- Architected and deployed a production-ready pixel art conversion platform handling 1,000+ weekly image conversions, and over 1000+ users.

Software Development Engineer Co-op Intern, Kaleida Health Center

01/2023 - 05/2023

Kaleida Health's Patient Diagnosis Information (Spring boot, React)

Remote - Buffalo, NY

- Developed a medical information system application using **Spring Boot**, **Spring MVC**, and **React**, improving patient data accessibility and system modularity.
- Designed and implemented **RESTful** microservices for user profile management and medical data, enhancing scalability and enabling seamless data retrieval.
- Integrated **AWS S3** for documentation and images uploads, enhancing scalability and improving the efficiency of managing and accessing inspection records through secure cloud storage.
- Conducted integration testing using **Postman** for the backend, adhering to **SCRUM development** practices.

Teaching Assistant, University At Buffalo

01/2023 - 05/2023

Computer Architecture Course(Graduate Level, CPU design)

Buffalo, NY

- Co-led a team of 5 TAs, instructing and guiding over 200 students and driving an over 18% course average grade increase compared to previous terms.
- Developed and presented a comprehensive **Verilog** usage tutorial, guiding students in micro single cycle CPU design. Assisted with the grading of all quizzes and exams, ensuring accuracy and constructive feedback.

Full stack Intern, Atwick Inc

02/2021 - 05/2021

Younite360 Employees management system (NodeJS, ExpressJS)

Remote - Ithaca, NY

- Designed and implemented efficient **RESTful APIs** for client-server interactions and **CRUD** operations using **NodeJS** and **ExpressJS**, utilizing middleware validation and error management, resulting in optimized server-side functionality.
- Developed an appointment scheduling system, improving team coordination and reducing appointment conflicts by providing scheduling, status updates, and cancellation options.
- Implemented **JWT token** authentication in a NodeJS application, improving API security by issuing signed tokens upon successful login, verifying tokens in subsequent API requests, and managing user sessions efficiently

Involvements/Certifications

HTML, CSS, and Javascript for Web Developers
Executive board UB SASE Club - Technical Director

Johns Hopkins University
2021 - 2022
